

1	liquid
2	filtration
3	solid
4	gas
5	mixture
6	evaporation
7	combustion
8	sieving
9	matter
10	freezing

	Something that contains two or more types of matter.	5
	This method of separation is used to separate a solid dissolved in a liquid.	6
	This is all around us. It is found in three states.	9
	This state of matter has no definite volume and no definite shape.	4
	This state of matter has a definite volume but no definite shape.	1
	This state of matter has a definite volume and a definite shape.	3
	This method of separation used to separate big solids from smaller solids.	8
	This method of separation is used to separate solids from liquids.	2
	This describes a chemical change.	7
	This describes a physical change.	10
